

SH-INSOLES Breakdown

Stop pain and fatigue in their tracks with our new *F2 FootForce* insole. Compatible with both ESD and conductive footwear, F2 insoles cushion your feet and stabilize your heels to keep leg and back pain at bay for hours.

1. Converse Foot Force Removable Insole System cushions entire foot.
2. Dual density polyurethane shock absorbing cushions in both heel and ball of the foot increase comfort and reduce foot strain. Polyurethane never loses its memory and ability to reduce foot shock.
3. Abrasion resisting and perspiration absorbing sock lining for cooler and dryer feet.
4. Heel cup and foot stabilizer help maintain ankle and heel alignment – reduces stress on ankle and knee joints. Elongated Podiatric arch support provides support and comfort throughout the day.
5. Polyurethane Shock Eliminator Pad reduces heel strike impact and increases comfort.

6. Fiber insole foundation board adds stability.
7. Heel cushion airbag absorbs impact shock.
8. Molded midsole stabilizes the foot and reduces foot shock.
9. External Molded Arch Stabilizer and Lateral Shank Support provide extra support and protection.
10. High abrasion Sure-Grip-Plus outsole for long life and better traction.
